CLAUDE DUET · MUSE · DOTS · GROK BOT

The AI agent *fight card*

Four AI assistants that message you first, compared round by round on their makers' own pages: what each does, what it costs, who can get it, and the catch.

THE FIGHTERS

Four agents in *10 weeks*

Each one has its own computer in the cloud and can reach out to you without being asked. Here's who they are, in launch order.

GROK BOT	**xAI (now SpaceXSI)** · beta since **11 Aug 2026**. A team of always-on Bots with their own cloud computer, in Grok's desktop and mobile apps, Slack, and @bot on X.
MUSE	**Meta** · **8 Sep 2026**. A personal AI agent in the Muse app, on muse.ai and in WhatsApp, running on its own secure computer (Muse Spark model).
DOTS	**OpenAI** · **29 Sep 2026**. "Your dot": an always-on agent **inside ChatGPT** (not a separate app), on GPT-6 Astra.
CLAUDE DUET	**Anthropic** · research preview since **21 Oct 2026**. Its own app (plus claude.ai) that briefs you every morning, on Claude Opus 5.5.

Not to mix up: ChatGPT Pulse (retired June 2026), Grok Automations, the Meta AI app and Claude's scheduled tasks are different products.

ROUND 1

Who messages you *first*?

CLAUDE DUET	**Yes.** A morning brief, then updates through the day. Checks your apps "every few hours"; no exact number is given.
MUSE	**Yes.** "It can send you messages without you prompting it", on a schedule and when something new happens. You can dial it up or down.
DOTS	**Yes.** Messages you "with progress, questions, or decisions that need you". It decides itself when to wake up and keep working.
GROK BOT	**Mostly when it needs you.** Bots "only come back when something needs your approval"; since 2 Oct your main Bot can also offer to take work. It runs on schedules **you** set, at least 5 minutes apart.

ROUND 2

What it *costs*

US prices per month, from each maker's own pricing page. No official rupee prices are published; check yours at checkout.

MUSE	**Free**, with a usage limit. Power **$20**, Maximum **$100**.
CLAUDE DUET	**Included** with Claude Pro (**$20**, or $17 billed yearly) or Max, at no extra cost during the preview. Its check-ins use your normal Claude limits.
GROK BOT	From **$30** (X Premium). Super $100, Ultra $200. Also included with paid Cursor and SuperGrok plans. X Plus doesn't include it.
DOTS	Needs **ChatGPT Pro**: from **$100** (Pro 100; also Pro 200 and Pro 500). Plus ($20) isn't eligible. Chats with your dot don't count toward your ChatGPT limits.

ROUND 3

Who can *get it*

CLAUDE DUET	**US only**, by waitlist, Pro and Max. Team and Enterprise are "not included yet". No date for other countries.
MUSE	**US and Canada**, 18 and over. "We don't have additional timing to share now."
DOTS	ChatGPT Pro users 18+ in **most countries**: everywhere except the **EEA, Switzerland and the UK**, rolling out gradually.
GROK BOT	**No country limit listed** for the app. Only tagging @bot on X is blocked in Australia, the UK, the EU, Iceland, Liechtenstein and Norway.

ROUND 4

The *catch*, and what to do about it

One honest catch each, from the maker's own help pages, plus the one thing I'd do.

MUSE	Uses your chats to improve Meta's AI models; the setting "is on when you first use Muse". **Do:** Settings → **Data controls** → turn it off (it also covers past chats).
DOTS	"You currently cannot view, delete, or directly modify individual dot memories." **Do:** keep sensitive projects out; deleting the dot is the only reset.
GROK BOT	"All of your Bots use the same cloud computer", with shared files and logins. Approvals from unattended runs expire in ~10 minutes. **Do:** don't treat separate Bots as separate locked rooms.
CLAUDE DUET	"You can't watch Claude Duet work in its browser or take over the browser" (Muse and dots let you). **Do:** read its task list; it asks before it sends, pays, signs or deletes.

THE VERDICT

No *knockout*

Each one wins a different job. Pick by what you need.

FREE TO START	**Muse**: a free tier with a usage cap (US and Canada).
SPARES YOUR LIMITS	**dots**: chatting with your dot doesn't count toward your ChatGPT limits (Pro).
YOUR OWN SCHEDULE	**Grok Bot**: you set every routine, down to 5-minute gaps.
ALREADY ON CLAUDE PRO	**Claude Duet**: no extra cost during the preview (US waitlist).

CAN'T GET ANY OF THEM YET?

You can build the part I use most, a morning brief from your Gmail and Calendar, in normal Claude today. My prompts are here: theabhaychopra.github.io/duet.

The fighters in my reel are the makers' own mascots in an AI-made scene; logos and mascots belong to Anthropic, Meta, OpenAI and SpaceXSI (xAI). Nobody sponsored this.

Pick your *fighter*

No knockout: the right one is the one that fits your job.
