OPUS 5.5 VS FABLE 5.2 · ONE REAL TEST

The prompt and the *fix message* for your website

The exact prompt I gave both models, the one message that brought Opus's missing pictures back, and how to catch this bug yourself.

SAME PROMPT · 2 MODELS · 1 FIX MESSAGE

THE TEST

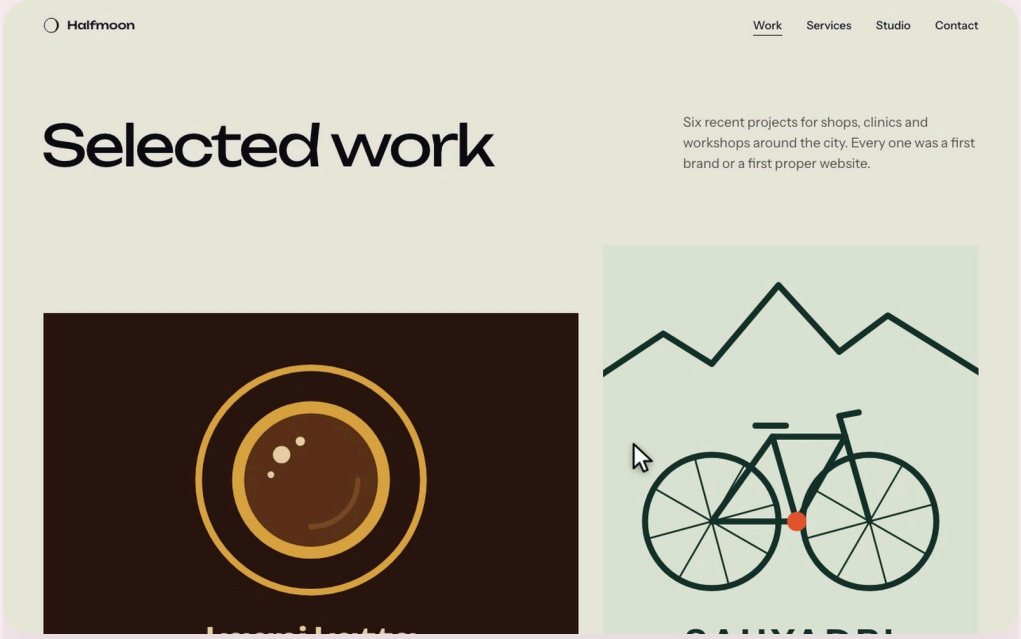

Same prompt, *two models*

I gave Claude Opus 5.5 and Claude Fable 5.2 the same prompt in Claude Code: a website for a design studio. Both used my own /awwwards design skill.

WHAT HAPPENED

OPUS 5.5	Done first: **7.2 min, $2.14**. The hero and pricing looked good, but the **six project pictures never appeared**.
THE FIX	One message in the same chat. **Fixed in one try**: about 45 s on my clock (39.2 s in its log), **+$0.22**.
FABLE 5.2	**Every picture on the first try**: 8.4 min, **$3.70**.
TOTAL	Opus with its fix: **$2.36**. Fable: **$3.70**.

Costs are Claude Code's own figure at API list prices, an estimate, not a plan bill. Claude Code 2.1.322, 10 Nov 2026.

Fable's Selected work, first try: artwork drawn for all six projects.

STEP 1

The *prompt*

Paste it into Claude Code as it is, or swap in your own business.

COPY THIS PROMPT

```
Build a website for my design studio, Halfmoon Studio. We're a
3-person studio in Pune that designs brands and websites for
small businesses.

One page with:
- a hero with our name and one line about what we do
- 6 selected projects in a grid (make the project images yourself
with CSS or SVG, no stock photos)
- our services, with prices starting at ₹25,000
- a short about section with the team
- a contact form

Make it look like a real studio's website: a strong layout,
smooth scroll animations, and real copy (no lorem ipsum).
It must work on a phone too.

Use plain HTML, CSS and JavaScript in this folder. No build step
and no libraries, except Google Fonts.
When it's done, open index.html in my browser.
```

MAKE IT YOURS

Change the studio name, the city, what you do and the starting price. Keep **"real copy (no lorem ipsum)"** and **"It must work on a phone too"**: they're why the site looks finished.

2 The fix message

Opus said the site was built. Then I scrolled to Selected work: the space stayed empty, only the text showed. I sent this in the same conversation:

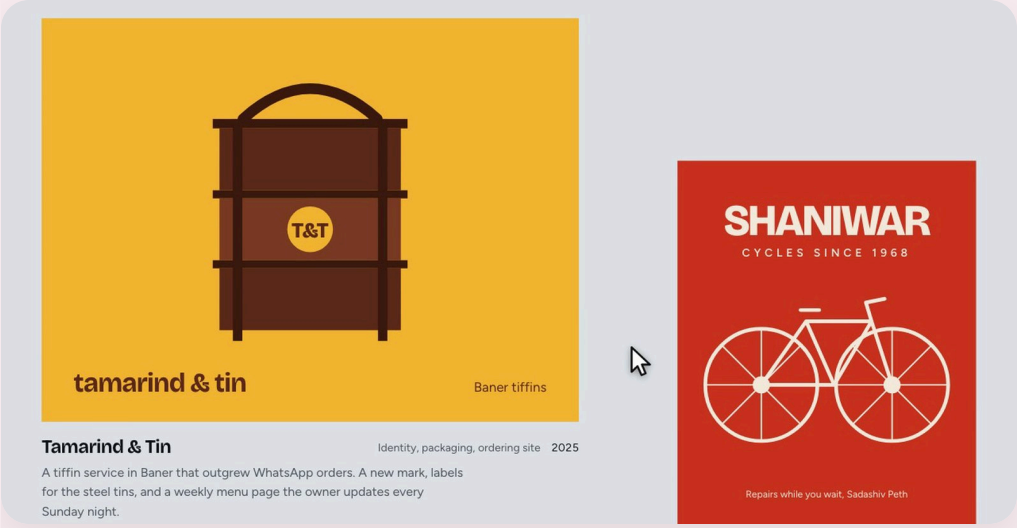

THE EXACT MESSAGE I SENT

```
This is broken: when I scroll down to Selected work, the project
pictures never show up. The space stays empty, only the text
appears. Fix it without changing anything else.
```

Fixed in one try: about 45 seconds, +$0.22 at API prices.

Before: Opus's Selected work, the pictures missing.

After one message: the same spot on the page.

BEFORE YOU SEND IT TO ANYONE

How to *spot* this kind of bug

- **Scroll every section, slowly.** The first screen of Opus's site looked done. The bug only showed further down.
- **Stop and wait at each section.** Scroll animations should finish in a second or two. A box that stays empty is broken.
- **Check it on your phone**, not just a narrow window. The prompt asks for it, so test it.
- **Open it in a second browser.** The missing pictures were a Chrome problem: the reveal animation never fired there.
- **Reload and scroll fast once.** Animations that start on scroll are the usual ones to break.

WHY IT BROKE

Each project picture was hidden behind a **clip-path reveal**, an animation that's meant to uncover it as you scroll to it. In Chrome it never fired, so the pictures stayed hidden while the text showed.

YOUR OWN FIX MESSAGE: FILL IN THE BRACKETS

```
This is broken: when I [what you did], [what should happen] never
[happens]. [What you see instead]. Fix it without changing
anything else.
```

WHEN TO USE WHICH

Opus or *Fable?*

OPUS 5.5	Your everyday model, and the default in Claude Code. **$4 / $20** per million tokens (input / output). Anthropic calls it "our strongest daily driver".
FABLE 5.2	For the big, open-ended jobs where getting it right the first time matters. **$8 / $40**: exactly **2×** Opus per token.
MY RULE	**Use Opus, but check its work before you send it.** Scroll everything, then send one clear fix message.
REACH FOR FABLE	When one fix doesn't do it, or when the job is too big to keep checking.

One run each. A second Opus run of the same prompt without my skills got every picture right ($1.51, 5.2 min), so treat this as one test, not a law.

Switch models in Claude Code

- Fable 5.2 needs **Claude Code 2.1.321 or later** (`claude --version` , then `claude update`).
- Type `/model fable` to switch, and `/model opus` to go back.
- `/usage` shows a session's tokens and its cost at API prices.

WHO GETS FABLE

Plans and *prices*

Anthropic's numbers, checked 10 Nov 2026.

FREE	No Fable.
PRO	Normally Fable runs on usage credits, which you pay for. **Launch week:** included up to 50% of your weekly limit, plus one Fable limit reset, until **16 Nov 2026, 11:59 pm PT**.
MAX, ULTRA	Included, up to 50% of your weekly limits.
AFTER THE 16TH	On Pro, the model menu says "Requires usage credits" and asks you to agree once. That's real money.
