ONE PROMPT · CLAUDE FABLE 5.2

The prompt to build your own *invoice app*

Invoices in ₹ with GST, the total in words and a PDF — on your laptop, with no accounts and no servers.

Invoice
INV-001

Halfmoon Studio
Kothrud, Pune
Maharashtra (27)

Billed to
Kora Cafe
Indiranagar, Bengaluru
Karnataka (29)

Invoice date 10 Nov 2026
Due date 25 Nov 2026
Place of supply Karnataka (29)

No.	Description	Quantity	Rate	Amount
1	Logo design	1	₹15,000.00	₹15,000.00
2	10 Instagram posts	1	₹15,000.00	₹15,000.00

Total in words
Rupees Thirty Five Thousand Four Hundred only

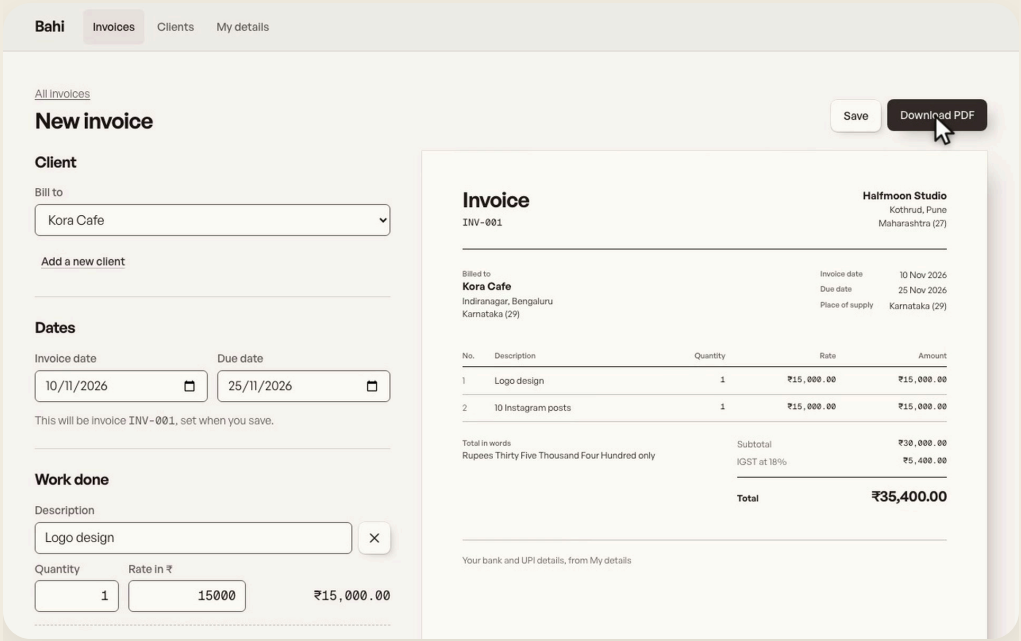

Subtotal ₹30,000.00
IGST at 18% ₹5,400.00
Total ₹35,400.00

Your bank and UPI details, from My details

9.3 MIN · $5.42 AT API PRICES · ONE PROMPT

WHAT IT BUILT

My freelance *invoice app*

The invoice form with its live preview. Test data only — Halfmoon Studio and Kora Cafe are made up.

SET UP ONCE	my details, my clients
INVOICE	line items in ₹ with a live preview
GST	an on / off switch and a rate (18% by default)
BY ITSELF	the client is in another state, so it picked **IGST 18%**
TOTAL	₹30,000 + ₹5,400 = **₹35,400**, and the amount in words
DOWNLOAD PDF	opens the browser's print-to-PDF

THE PROMPT

Copy it as it is

COPY THIS PROMPT

```
Build me an invoice app for my freelance work. It runs in the
browser from this folder: plain HTML, CSS and JavaScript, no
build step. Save everything on my laptop (localStorage). No
accounts, no servers.

- My details, saved once: name, address, GSTIN (optional), bank
and UPI details
- Clients: name, address, state, GSTIN (optional)
- An invoice: number (automatic), date, due date, line items
(description, quantity, rate in ₹), subtotal
- GST: a rate field (default 18%) with an on/off switch. Show
CGST + SGST when the client is in my state, and IGST when they're
in another state
- The total in ₹, in numbers and in words
- A "Download PDF" button that saves a clean A4 invoice
- A list of past invoices, each marked paid or unpaid

When it's done, open it in my browser.
```

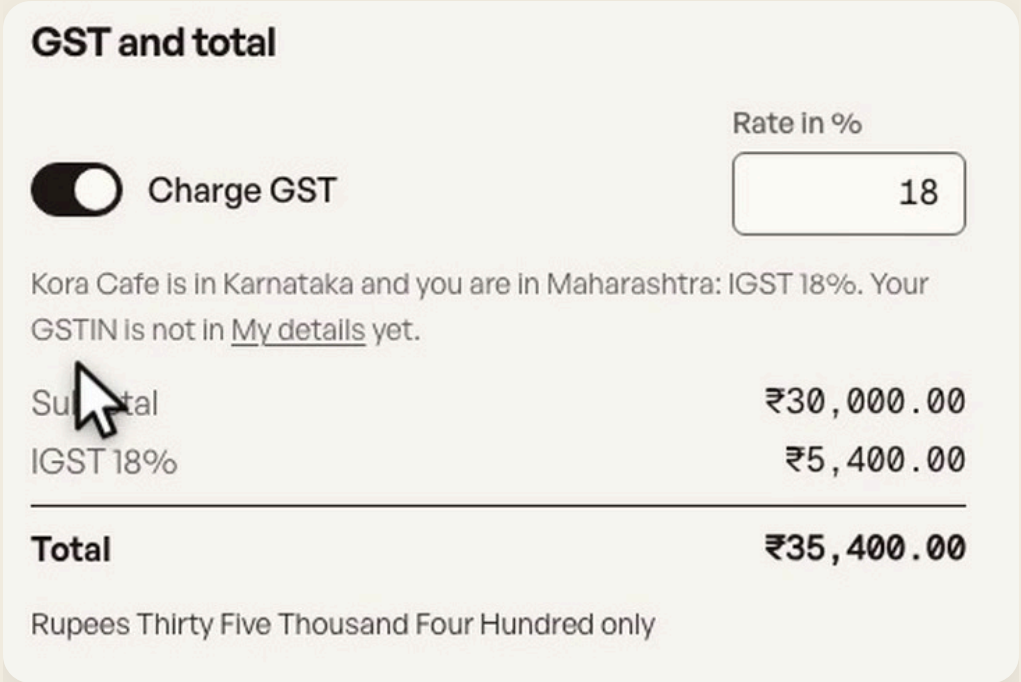

MY RUN

MODEL	Claude Fable 5.2 in Claude Code
TIME	**9.3 minutes**, one prompt
COST	**$5.42** — Claude Code's own estimate at API list prices, not a plan bill

HOW TO RUN IT

Four steps in Claude Code

- **Update Claude Code.** Fable 5.2 needs version **2.1.321 or later** (`claude --version`).
- **Open it in an empty folder** — the app is built there.
- **Type** `/model fable` to switch. `/model opus` switches back; Opus 5.5 stays the default.
- **Paste the prompt** and let it work. It opens the app in your browser; add your own details first.

A client in Karnataka, me in Maharashtra: it switched to IGST on its own.

BEFORE A REAL INVOICE

Read this *first*

NOT TAX OR LEGAL ADVICE

This is an app an AI built for me, not an accounting product. **Check the GST rules for your work with a CA** before you send a real invoice. If you're not registered for GST, switch it off.

YOUR DATA STAYS IN YOUR BROWSER

Everything is saved in your browser's **localStorage** on your laptop — no accounts, no servers. Clearing your browsing data deletes it, so keep a backup. (Mine added a "Save a backup file" button.)

TRY OPUS FIRST

Opus 5.5 costs half as much per token as Fable. I ran this prompt on Fable, so I can't promise Opus gets the same result — but it's the cheaper first try: type /model opus instead.

WHAT IT COSTS

What Fable *costs*

PRICE	Fable 5.2: **$8 / $40** per million tokens in / out. Opus 5.5: **$4 / $20**. Fable is exactly **2×** per token.
FREE PLAN	No Fable.
PRO	Normally Fable runs on **usage credits** (paid), not your plan's limits. Launch week it's included, up to 50% of your weekly limit, until **16 Nov 2026, 11:59 pm PT**.
MAX, ULTRA	Included, up to 50% of your weekly limits.
THE MENU	Where Fable bills to usage credits, `/model` shows "Requires usage credits" and asks once. That's real money.

Anthropic's numbers, checked 10 Nov 2026. Their own advice: start with Opus 5.5, "our strongest daily driver"; Fable is "best for the most ambitious, open-ended technical work".
