CLAUDE FABLE 5.2 · ONE PROMPT · HANDS OFF

The *exact prompt* I used for this website

What it built in 8.4 minutes, a fill-in version for your own business, and what to check before you ship.

1 PROMPT · 8.4 MIN · $3.70 AT API PRICES

WHAT HAPPENED

One prompt, *a whole site*

In Claude Code I typed `/model fable`, pasted one prompt and didn't touch it. It picked my own /awwwards design skill by itself, planned the design, wrote all the copy, drew artwork for six projects and opened the site in my browser.

1
prompt, nothing typed after it

8.4 min
from the prompt to the open site

6
project pictures drawn in code, no stock photos

$3.70
Claude Code's cost at API list prices (an estimate, not a plan bill)

The six project pictures Fable drew for the studio's Selected work.

COPY THIS

The *exact* prompt

Word for word what I sent. Claude Fable 5.2 in Claude Code 2.1.322, 10 Nov 2026.

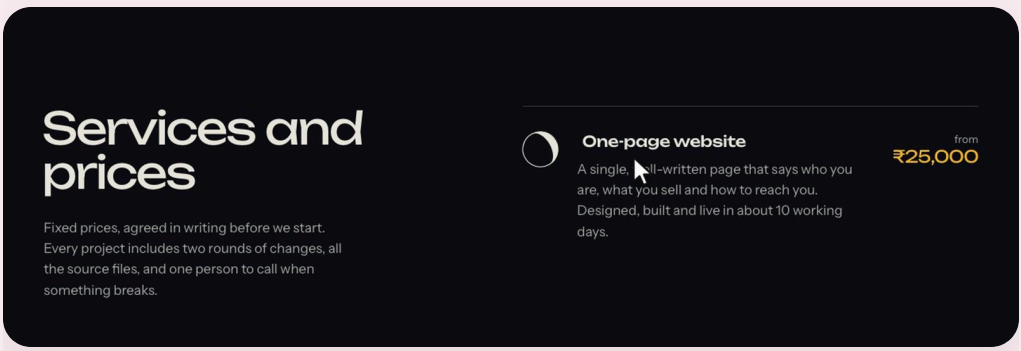

COPY THIS PROMPT

```
Build a website for my design studio, Halfmoon Studio. We're a
3-person studio in Pune that designs brands and websites for
small businesses.

One page with:
- a hero with our name and one line about what we do
- 6 selected projects in a grid (make the project images yourself
with CSS or SVG, no stock photos)
- our services, with prices starting at ₹25,000
- a short about section with the team
- a contact form

Make it look like a real studio's website: a strong layout,
smooth scroll animations, and real copy (no lorem ipsum).
It must work on a phone too.

Use plain HTML, CSS and JavaScript in this folder. No build step
and no libraries, except Google Fonts.
When it's done, open index.html in my browser.
```

Its services section, prices from ₹25,000 as the prompt asked.

MAKE IT YOURS

The *fill-in* version

The same prompt with your details in the brackets. Delete the brackets when you fill them.

FILL IN THE BRACKETS

```
Build a website for my [type of business], [business name]. We're
[how many people] in [city] and we [what you do, and for whom].

One page with:
- a hero with our name and one line about what we do
- [number] [projects / products / dishes] in a grid (make the
images yourself with CSS or SVG, no stock photos)
- our [services / menu], with prices starting at [your
lowest price]
- a short about section with [the team / the owner]
- a contact form

Make it look like a real [type of business]'s website: a strong
layout, smooth scroll animations, and real copy (no lorem ipsum).
It must work on a phone too.

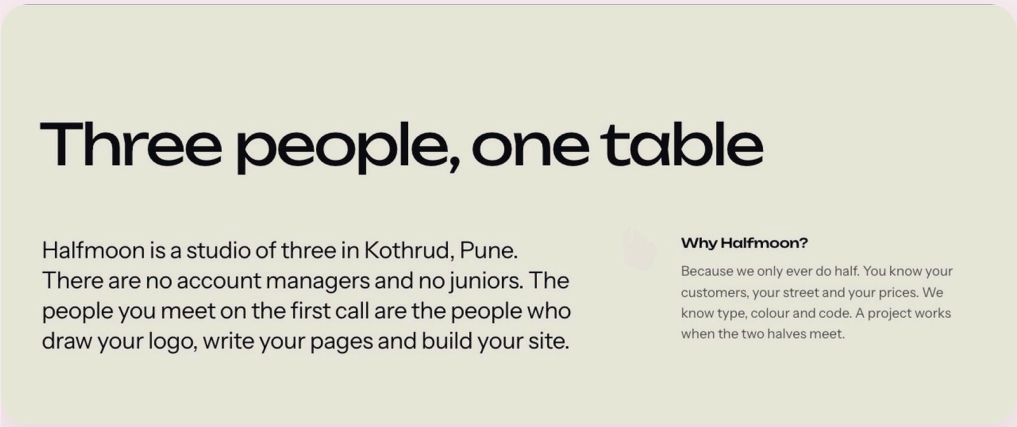

Use plain HTML, CSS and JavaScript in this folder. No build step
and no libraries, except Google Fonts.
When it's done, open index.html in my browser.
```

- **Keep "real copy (no lorem ipsum)".** It's why the site reads finished.
- **Give it real facts:** your street, your prices, your hours. Whatever you leave out, it makes up.
- **No contact form?** Ask for a WhatsApp button or a booking link instead.

BEFORE IT GOES LIVE

What to check *before you ship*

- **Scroll every section, slowly, and wait.** Pictures that appear on scroll can stay empty. Opus's site from this same prompt looked done until I reached its six project pictures: they never showed up.
- **Open it on your phone.** The prompt asks for it, so test it.
- **Read every word.** It invents what you don't give it: Fable made up six client projects (Kaapi Katta, Ovi Dental Care…) and its own small print ("Prices are before GST"). Swap in your real work and terms.
- **Send yourself a test message.** A plain HTML form needs somewhere to send to, like a form service or your email. If nothing arrives, ask Claude to connect it.
- **Click every link and menu item**, then open it in a second browser.

Its About section: every word written by Fable. Check names, places and claims.

WHAT IT COSTS

Fable or *Opus?*

FABLE 5.2	**$8 / $40** per million tokens (input / output). This site: **8.4 min, $3.70**, every picture right the first time.
OPUS 5.5	**$4 / $20**, half the price per token. The same prompt with my skills: 7.2 min, $2.14, but the six pictures needed one fix message (+$0.22).
OPUS, NO SKILLS	A second Opus run of the same prompt by itself: 5.2 min, $1.51, every picture showed.
MY RULE	Opus first, and check its work. Save Fable for the big jobs.

Costs are Claude Code's own figure at API list prices, an estimate, not a plan bill.

ABOUT MY TEST

One run each on my Mac, 10 Nov 2026 (Opus twice: with and without my skills). Every build is plain HTML, CSS and JavaScript, so the site is just files in a folder. The project names, clients and copy on it were all written by Fable.

ANTHROPIC'S NUMBERS, 10 NOV 2026

Who gets *Fable*

- **Free:** no Fable.
- **Pro:** usage credits you pay for, except launch week: included up to 50% of your weekly limit until **16 Nov 2026, 11:59 pm PT**.
- **Max, Ultra:** included, up to 50% of your weekly limits.
- Needs **Claude Code 2.1.321 or later**. `/model fable` switches, `/model opus` goes back, `/usage` shows the cost.
