BOTH PROMPTS + MY EXACT SETTINGS

Turn one photo into a video of you in *10 poses*

Made in Google Flow on the free daily credits — the two prompts, the settings, and the one line that keeps your face the same.

BEFORE YOU START

What you *need*

- **A Google account** — Flow is for ages 18+ and works in India.
- **Google Flow** — a website, nothing to install: labs.google/flow. Phone browser or laptop.
- **One clear photo of you** — the next page says which kind.
- **Free credits** — Flow gives everyone 50 credits a day. One 10-second video is 15.

HOW IT WORKS

Flow doesn't have a "10 poses" button. You do it in two moves: first Flow makes **one image** of you in 10 poses, then it **animates that image** so every pose moves on its own.

THE STEPS

0 **Pick the right photo** — the face starts here

1 **Upload it** to a new Flow project

2 **Make one image of you in 10 poses** — prompt 1

3 **Animate it** — prompt 2

\+ **One pose, full screen** — bonus prompt

STEP 0

Pick the *right photo*

The #1 complaint on this trend is "my face changed". Most of the time, the photo is why.

USE A PHOTO THAT IS

FRONT-FACING	both eyes visible, looking at the camera
SHARP, WELL LIT	daylight from a window is perfect
UNFILTERED	no beauty mode, no smoothing, no stickers
JUST YOU	never other people's photos, and no children
WAIST-UP	or full body, on a plain wall — the poses need your body too
FACE CLEAR	no sunglasses, no cap covering your face

WHY FACES DRIFT

A filtered selfie gives Flow a face that isn't quite yours, a side angle hides half of it, and a tiny low-res photo leaves it guessing. Start sharp and straight-on, and the face-lock lines (page 7) do the rest.

1 Upload your photo

Open labs.google/flow → **New project** → upload your photo into it.

2 Make one image of you in 10 poses

PROMPT 1 — IMAGE (NANO BANANA, 9:16), YOUR PHOTO ATTACHED

```
Use my uploaded photo as the only reference for this person.
Make ONE vertical 9:16 image: a clean grid of 2 columns × 5 rows
— 10 panels of the SAME man, full body, in 10 different poses
(the list is below).
Keep his exact face, hairstyle, beard, skin tone and body
shape from my photo in every panel. Do not beautify, slim or
change him.
Same outfit in all 10 panels: black t-shirt, dark jeans,
white sneakers.
Plain white studio background, soft even light, thin white gaps
between panels. No text, no numbers, no borders.
```

Make 2 and keep the one where **every** face looks like you. If one panel looks like someone else, generate again — don't animate it.

ADD TO PROMPT 1

```
Poses, left to right, top to bottom:
1. standing straight, hands in pockets
2. arms crossed, confident smile
3. walking towards the camera
4. looking back over his shoulder
5. sitting on a stool, leaning forward
6. adjusting his watch
7. hand on his chin, thinking
8. laughing, head tilted back
9. leaning on a wall, one foot up
10. side profile, looking into the distance
```

PROMPT 1, YOUR WAY

Make it *yours*

Change the words, keep the face-lock lines.

SWAP IN YOUR VERSION

WOMEN'S VERSION	write **woman** instead of man, and *her* instead of his
TRADITIONAL OUTFIT	describe it in the outfit line — *a dark green silk saree with gold border and jhumkas* — and add **keep the saree and jewellery identical**
FEWER POSES	a 2 × 3 grid of 6 poses gives each face more pixels — easier to keep it yours
YOUR BUSINESS	a product in your hand, your shop as the background, a uniform as the outfit

MAKE 2, KEEP THE BEST

Generate the image twice and keep the one where **every** face looks like you. A wrong face in the image stays wrong in the video.

3 Animate it

Pick **Frames to Video** and set your 10-pose image as the first frame.

PROMPT 2 — VIDEO

```
Animate this image. It is a grid of 10 panels of the same man.
Animate every panel on its own, with small natural movements that
fit its pose — a step, a turn of the head, a smile, a breath, a
hand moving.
Keep his exact face and outfit from the image in every frame. No
face changes, no morphing, no new people.
The grid, the white gaps and the background stay perfectly still:
static camera, no zoom, no pan, no transitions, no text.
Realistic, smooth motion for the full 10 seconds.
```

MY SETTINGS

MODE	Frames to Video — the 10-pose image as the first frame
MODEL	Omni — the one with a **10 s** option
RATIO	9:16 (vertical, made for Reels)
LENGTH	10 s
QUALITY	720p = 15 credits · 360p = half that, good for a test run
OUTPUTS	1 — each extra output costs the same again

THE FIX NOBODY SHOWS

The *face-lock* lines

These lines are already in both prompts. If your face still drifts, check they're there, word for word.

KEEP THESE IN EVERY PROMPT

```
Keep his exact face, hairstyle, beard, skin tone and body shape
from my photo.
Do not beautify, slim or change him.
No face changes, no morphing, no new people.
Static camera, no zoom.
```

STILL CHANGING? TRY, IN THIS ORDER

1. A sharper, front-facing photo with **no filter** (page 3)
2. **Fewer poses** — 6 instead of 10, so each face is bigger
3. **Smaller movements** — "a breath, a small smile", not "dancing"
4. **360p first** to test cheaply, then 720p once the faces hold
5. Regenerate the **image** before you animate it

BONUS

One pose, *full screen*

The grid is the hook. One pose on its own, full screen, is the clip you'll actually post.

PROMPT 3A — IMAGE, YOUR 10-POSE IMAGE ATTACHED

```
From this grid, take pose 3 and make it a single full-frame
vertical 9:16 photo of him in that pose. Same face, same outfit,
same white studio, full body, sharp. Keep his exact face from
my photo.
```

PROMPT 3B — FRAMES TO VIDEO, 9:16, 8 S

```
Animate this photo: he walks two steps towards the camera and
smiles. Keep his exact face and outfit. Static camera, no zoom.
Realistic, smooth motion.
```

COST

An 8-second Omni video at 720p is **12 credits.** The grid (15) + one full-screen pose (12) = 27 — inside one day's free 50.

WHAT IT COSTS

3 videos a day → *$0*

Everyone gets 50 credits a day, with or without a subscription.

FLOW CREDITS — FROM GOOGLE'S HELP PAGES

FREE, DAILY	**50 credits a day**, with or without a subscription
10 S VIDEO	15 credits at 720p (Omni) — half at 360p
8 S VIDEO	12 credits at 720p (Omni)
AI PLUS	+200 credits a month (₹399/month in India)
AI PRO	+1,000 credits a month (₹1,950/month · $19.99 in the US) — you don't need it for this

Checked on 21 Oct 2026 on Flow's credits page and Google's India plans. Google changes these — check before you buy anything.

GOOD TO KNOW

Before you *post*

EVENING RUSH	without a subscription you may not be able to make videos from about **7:30 to 10:30 PM IST** (2–5 PM UTC). Make them in the morning.
WATERMARK	videos made in India get a small visible Google watermark, plus an invisible SynthID one. Only the top Ultra plan removes the visible one.
COULDN'T GENERATE	Flow filters uploaded photos of people. Try a clearer photo of yourself — never someone else's, never a child's.
PHONE TROUBLE	use Chrome, or a laptop. The Flow Agent (asking for variations in chat) is web-only.
CLIENT WORK	Google says it won't claim ownership of what you make — read Flow's terms first.
AI LABEL	these are AI videos made from your photo — turn on Instagram's AI label when you post.

Now make *yours*

One clear photo is all it takes.

— Abhay
